NATIONAL INCIDENT-BASED REPORTING SYSTEM (NIBRS) WITH EFORCE® SOFTWARE

We understand that navigating the complexities of NIBRS reporting is a significant challenge, especially for those in the records department who are tasked with ensuring compliance. The real struggle isn't just about simplifying submissions; it's about how data is initially entered by patrol officers. However, the harsh reality is that Patrol is the group with all the information about an incident, but none of the knowledge for how to report it. At EFORCE®, we recognize these frustrations and have developed a solution that targets this root problem. By translating NIBRS terminology into language that patrol officers understand and integrating compliance checks throughout the reporting process, we make it easier for officers to submit accurate reports from the start. This not only streamlines the workflow for patrol but also dramatically reduces the administrative burden on records departments, freeing them up to focus on other critical tasks.

Key Features:

Simplified Data Submission:

EFORCE® With EFORCE®, compiling and submitting your monthly NIBRS reports is streamlined and efficient, requiring only a couple of mouse clicks. This simplified process dramatically reduces the time and effort needed to achieve compliance. This efficiency not only makes NIBRS compliance faster but also significantly cuts down on man hours, making your operations more productive and cost-effective.

Built-in Compliance Checks:

Our system integrates NIBRS compliance requirements directly into the incident report workflow. Officers won't see the submit button until their report meets all NIBRS standards, reducing the need for post-submission corrections and saving time for both patrol and records. This proactive approach ensures that all necessary data is captured upfront, minimizing errors and ensuring that reports are fully compliant before they reach the records department.

Streamlined Reporting:

EFORCE® automates the submission of NIBRS reports to the state, ensuring a smooth and efficient process. With our comprehensive approach, agencies can submit their monthly NIBRS reports with just a few mouse clicks, freeing up valuable time and resources for other important tasks. This automation not only simplifies the reporting process but also enhances accuracy and timeliness.

WHY CHOOSE EFORCE?

Proven Excellence

Trusted by agencies both large and small, EFORCE® Software has a track record of delivering exceptional dispatch management solutions.

Scalable Solutions

Our software system is scalable to accommodate the evolving needs of your agency. Grow seamlessly without compromising efficiency.

Dedicated Support

Experience unmatched customer support and ongoing training to ensure that your agency maximizes the potential of EFORCE®.

Optimize your software operations with EFORCE® Software – the leading choice for law enforcement agencies.

“

We love the ability to extract data for reports and statistics. It's easy to learn and use. It's a capable RMS software with a very reasonable price.

Sitka Police

”

“

We've liked the reasonable cost, and working with the company to ensure it meets the needs of the department. As well, it is easily adaptable to changes.

Monte Vista Police

”
