STREAMLINE INMATE MANAGEMENT AND OPERATIONS WITH EFORCE® JAIL SOFTWARE

Explore the key features of EFORCE® Jail Software that are specifically designed to empower deputies in their daily tasks, streamline jail operations, and enhance overall efficiency in managing inmate processing and care.

Key Features:

Intuitive User Interface:

The software features an intuitive and user-friendly interface that simplifies navigation, allowing officers to quickly enter data and access critical information without extensive training. This design minimizes the learning curve, enabling deputies to become proficient in using the software almost immediately.

Integrated Reporting Tools:

EFORCE® Jail Software allows deputies to generate and submit reports seamlessly, ensuring that all records are precise and up-to-date. This not only minimizes paperwork but also significantly reduces the administrative burden on supervisors.

Pre-Booking Inmates:

EFORCE® Jail Software enables deputies to efficiently pre-book inmates directly from the field, significantly streamlining the intake process. By allowing officers to gather essential information—such as personal details, arrest charges, and any pertinent medical history—before arriving at the jail, this feature dramatically reduces wait times and expedites the booking procedure. Deputies can input data seamlessly using their mobile devices, ensuring that all necessary documentation is completed in advance.

Real-Time Data Access:

Jails often act as the main intelligence hub for agencies, with the data gathered here directly influencing operational strategies. With real-time access to inmate status, facility capacity, and available resources, deputies can make informed decisions during arrests and transport.

Secure Communication:

The system facilitates secure communication between deputies in the field and jail staff, ensuring that all parties are informed and can coordinate effectively during the booking process.

WHY CHOOSE EFORCE?

Proven Excellence

Trusted by agencies both large and small, EFORCE® Software has a track record of delivering exceptional dispatch management solutions.

Scalable Solutions

Our software system is scalable to accommodate the evolving needs of your agency. Grow seamlessly without compromising efficiency.

Dedicated Support

Experience unmatched customer support and ongoing training to ensure that your agency maximizes the potential of EFORCE®.

Optimize your software operations with EFORCE® Software – the leading choice for law enforcement agencies.

“

It streamlines workflow and links us with other nearby departments. We like the accessibility, ease of use and storage.

Washington County Sheriff's Office

”

“

It's easy to use, and we like being able to share and search between agencies. We also like that it can be customized just for our agency.

Jackson County Sheriff's Office

”
